LH

## SUMMARY

Solution-focused Front End developer with 1 year of experience creating web-based applications. Skilled in writing clean, maintainable code and effectively troubleshooting issues. Expertise in consumer-focused website development using HTML, CSS, Bootstrap, vanilla JavaScript, ReactJS and Firebase. Goal is to deliver high-quality, user-friendly web solutions that meet the needs of end-users.

## EXPERIENCE

### ApplyForMe

#### Junior Front End Developer

📅 2022 - present 📍 Remote

A platform where job seekers can create and update their job profile, and then get notified when a company or hiring manager is interested in their skills and experience.

- Synergistically collaborated with a team of 15 members with the marketing and project management departments as a result of which a significant increase in client numbers, exceeding 20% was achieved.
- The project was guided to its successful completion through the expert application of exceptional leadership proficiency.
- A hands-on approach was taken towards the project management, resulting in the optimization of processes and delivery of outstanding results, which led to 45% increase in efficiency within the team.
- User flows and wireframes were transformed into intuitive and engaging experiences through collaboration with the design team.
- Seamless integration and optimal performance of the products were ensured through close collaboration with backend engineers.
- A 50% increase in turnover was driven through the day-to-day efforts of keeping the website updated, functional and visually appealing.
- Research findings were presented to key decision-makers in a clear, concise, and compelling manner, expertly, to support the decision-making process and catalyze business growth.
- A task tracking application using Reactjs and Firebase was developed, streamlining task management and increasing efficiency in achieving goals.

## SKILLS
